

MUHAMMED YASEEN

BACKEND DEVELOPER | CYBERSECURITY ENTHUSIAST

Backend Developer with a strong focus on Python-based systems, API development, and database driven applications. Experienced in building scalable backend solutions, automation workflows, and asynchronous services. Possess strong analytical thinking, problem-solving ability, and a keen attention to detail, with a growing interest in cybersecurity.

PROJECTS

PDF & NOTES SHARING WEBSITE

🌐 <https://study-notes-rho.vercel.app/>

- Developed a platform to share academic PDFs and study materials
- Structured content for easy access during exams
- Built frontend using HTML, CSS and handled content organization

USER AUTHENTICATION SYSTEM

- Built login and signup system using Node.js
- Implemented basic validation and backend logic
- Managed routing and user data handling

SEARCH & REQUEST AUTOMATION

- Developed an asynchronous Telegram-based backend to index and serve media across multiple channels
- Implemented SQLite-based persistence for user activity and request tracking with automated notifications
- Engineered retry-safe file delivery using exponential backoff and concurrency throttling
- Designed per-user caching with auto-expiry to optimize performance and chat scalability

Tools

- VS Code
- GitHub
- Kali Linux

SKILLS

- Backend Development (Node.js)
- Database Management (MongoDB)
- Authentication & Authorization
- Server-Side Logic & Routing
- Git Version Control
- Problem-Solving
- Debugging & Error Handling

EDUCATION

Secondary School
Rahmania HSS
2021 - 2023

Bachelor In Computer science
Sullamussalam Science College
2023 - 2026

LANGUAGE

English
Malayalam
